

Project Blueprint: Juris (The Legal Intelligence Hub)

Vision: To become the "Legal Cheek" of Canada—the definitive, data-driven career and media platform for law students and junior legal professionals, starting with a 2026 Ontario-first launch.

1. Design Language & Aesthetic

The website must look as stable as a white-shoe law firm but as clean as a high-end tech platform.

- **Color Palette:** Strict High-Contrast Monochrome.
 - **Background:** #FFFFFF (White)
 - **Text/Primary:** #000000 (Black)
 - **Accents/Dividers:** #F2F2F2 (Light Grey) for subtle depth.
- **Typography:**
 - **Headings:** Bold, modern Sans-Serif (e.g., Inter or Montserrat).
 - **Body:** Elegant, readable Serif (e.g., Lora or Playfair Display).
- **UI Components:** 0px border radius (sharp corners), 1px solid black borders, no drop shadows, no gradients.

2. Core Platform Pillars (The "Big Three")

A. The Firm Directory (The Database)

A comprehensive list of every major law firm in Ontario.

- **The List View:** A clean grid of cards. Each card displays: Logo (B&W), Firm Name, Articling Salary, and Location.
- **Filtering:** A "sticky" sidebar or top-bar allowing users to filter by: City, Practice Area, Salary Range, and 'Verified' Status.
- **The Profile Page:** A split-screen layout.
 - **Sidebar (Sticky):** "Hard Data" (Salary, Class Size, Deadlines, Retention Rates).
 - **Main Content:** "The Vibe" (Editorial reviews, office culture, AI policies, and work-life balance stats).

B. The Law School Hub (The Comparison Tool)

A dedicated area for prospective students to compare Ontario institutions.

- **Comparison Matrix:** A side-by-side data table comparing Tuition, Median LSAT/GPA, and Employment Outcomes (e.g., "Seven Sisters" hire rate).
- **School Profiles:** Detailed deep-dives into moot court opportunities, clinics, and "Pre-Law" pathways (specifically for McMaster/Social Science students).

C. The Recruitment Tracker (The Live Feed)

The "heartbeat" of the site during recruitment season.

- **Deadlines:** A real-time countdown to OCI (On-Campus Interview) and Articling application deadlines.
- **Status Indicators:** Color-coded text (Black/Grey) showing if a firm is "Open," "Closing Soon," or "Closed."
- **Linked Applications:** A direct button for each firm's internal application portal or early careers page.

3. Page-by-Page Functionality Breakdown

Homepage (The Dashboard)

- **Hero Section:** Minimalist search bar: "Search Firms, Schools, or Salaries."
- **Live Tracker Widget:** A scrolling ticker or small box showing the next three major recruitment deadlines.
- **Trending Insights:** A "Legal Cheek" style feed of the three most recent news articles or "Vibe Checks."
- **Footer:** Newsletter sign-up for the "2026 Salary Report."

News & Insights (Media Section)

- **Categories:** Careers, Market News, Student Life, and "The Vault" (Anonymous interviews).
- **Format:** High-resolution B&W photography, heavy focus on typography-led layouts.

The "Verified" Portal (B2B Feature)

- **Concept:** A login gateway for law firm HR departments.
- **Goal:** To allow firms to claim their profiles and ensure their salary/perk data is 100% accurate.

4. Business Intelligence & Analytics Tracking

To be built into the backend to provide value for "Verified" partners.

A. Behavioral Analytics (The "Student Funnel")

- **Profile Engagement:** Track total views, average time spent on "Vibe Check" sections vs. "Hard Data" sidebars.
- **Click-Through Rates (CTR):** Track how many students click the "Apply" button or "Early Careers" links from a specific profile.
- **Search Intelligence:** Track the most common search terms (e.g., "Hamilton Litigation" or "Hybrid Work Policy") to show firms what students are actually looking for.

B. Brand Perception Metrics

- **The "Vibe" Heatmap:** Track which specific firm perks (e.g., AI training, wellness allowance, or billable targets) get the most clicks/interest.
- **Comparative Benchmarking:** Provide firms with data on how their profile engagement compares to their "Peer Group" (e.g., how a boutique compares to other boutiques in the same city).
- **Drop-off Analysis:** Track if students exit the site specifically after viewing high billable targets or low retention rates to help firms identify "recruitment leakage."

C. Audience Demographics (via Newsletter/Lead Gen)

- **University Affiliation:** Anonymized data showing which law schools are most interested in a specific firm (e.g., "40% of your profile traffic came from Osgoode students").
- **Year of Study:** Categorize traffic by 1L, 2L, or 3L/Articling status.

5. User Experience (UX) Goals

- **Speed:** The site must load instantly. Law students are time-poor.
- **Mobile-First:** The "Deadline Tracker" and "Firm Cards" must be perfectly readable on a phone.
- **Democratization:** All data must be accessible without a paywall. The "Value Exchange" is their email address.

6. Summary for the Developer Call

"I am looking for a data-heavy, high-prestige directory. The demo should focus on the search/filter functionality and the visual hierarchy of the firm profiles. The challenge is making a site with zero color look premium through expert use of white space and typography. The platform must be built so I can eventually upload a CSV/spreadsheet of 200+ firms and schools.

Crucially, the site needs 'Business Logic' built in:

- **HR Dashboard:** A gateway for firms to manage 'Premium' content.

- **Ad Placements:** Clean, minimalist zones for 'Featured Partners.'
- **Analytics Engine:** The backend must track profile views, school affiliation, and 'Apply' button clicks. I need to be able to tell a firm: 'Your profile was viewed by 500 students from UofT and Osgoode last week.' This data is our primary renewal driver."
